

DAVICO GOES INTERNATIONAL

COAHUILA MEXICO

Your Guide to the Expansion

WHERE.

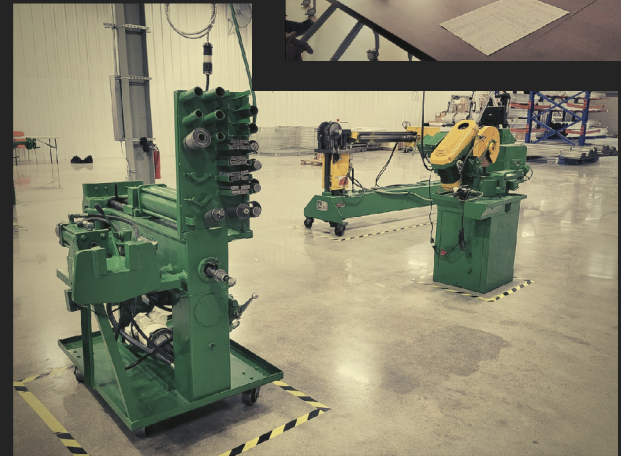

Production.

Davico Mfg. is pleased to announce the addition of a second facility in Coahuila Mexico. This expansion will allow Davico to meet the growing demands from our customers as well as take more control over our supply chain. This new facility will have full production capabilities to produce all of our direct fit catalytic converter and pre-bent exhaust products

WHEN.

Timeline.

Production began in mid-June and continues to ramp up. This new facility is an expansion of our production capacity and will be in addition to our plant in New Bedford Massachusetts. We will continue our commitment to manufacturing in the USA as we have since 1987.

QUOTE:

Ray Surprenant (President)

"I am looking forward to utilizing the capacity this new plant to building inventory for quick delivery out of our New Bedford facility to better serve our customers. This investment will allow us to be the best option for cost, order fill, coverage, and same day special orders."
